EDUCATION

Duke University

Durham, NC

Master of Engineering in Financial Technology | Aug 2025 – Jun 2027

- Coursework: Machine Learning, Statistical Analysis, Asset Pricing and Risk Management, Python Programming, Data Processing and Algorithms.

Shanghai Lixin University of Accounting and Finance

Shanghai, China

Bachelor of Economics in Financial Engineering | Sep 2021 – Jun 2025

- Honors: Shanghai Outstanding Graduate; Outstanding Student Leader.

SKILLS

Data and Analytics: SQL, Python (Pandas, NumPy, scikit-learn, Matplotlib), Excel (VBA, PivotTables), Tableau, Power BI, A/B testing

AI and Automation: AI agent workflow design, LangChain, prompt engineering, multimodal content analysis, API integration, Codex, <https://github.com/hengzhenjiang01>

Languages: Mandarin Chinese (native), English (professional proficiency; TOEFL 105)

PROFESSIONAL EXPERIENCE

Lovart | International KOL Operations Intern

Jun 2026 – Aug 2026

Beijing Qidian Xingyu Technology Co., Ltd. | Global Growth and AIGC Product Marketing

- Planned Lovart x SMB and Lovart x Seedance 2.5 campaigns for Europe and North America; analyzed competitors and creator segments to position Lovart's brand-design and AI-video capabilities for SMB owners, designers, and video creators.
- Managed creator partnerships across TikTok, Instagram, and YouTube, reaching 500+ creators and reviewing product demonstrations, messaging, and creative quality; delivered 85 sponsored posts with 10M+ total impressions while keeping Instagram and YouTube CPMs near \$15 and \$100, respectively.
- Built a LangChain-based KOL information-processing agent and integrated Python with Feishu APIs to synchronize collaboration records, deduplicate matches, and backfill publishing data, improving data accuracy and operating efficiency.

IQIYI International | North America Marketing Operations Intern

Jan 2026 – Apr 2026

- Analyzed 33,876 responses from an annual user survey across English-speaking markets, evaluating audience preferences and growth potential for Asian dramas, short-form dramas, anime, and AI-generated series.
- Segmented findings by country, subscription status, age, and ethnicity; identified Korean dramas and anime as high-potential acquisition categories among non-subscribers and social media as the primary discovery channel for audiences unfamiliar with short-form dramas.

Dewu | Business Analysis Intern, Beauty Card Program

Feb 2025 – May 2025

- Queried and cleaned behavioral data with SQL and Python; segmented high- and broad-intent users by purchase frequency and brand-browsing depth, then designed differentiated SMS outreach validated through A/B testing, generating 500+ new card activations and lifting activation rate about 12% month over month.
- Built a multi-criteria Excel model to select campaign merchants and a BI dashboard to monitor activation and SKU-redemption funnels; shifted placement allocation from static ranking to iterative, data-driven optimization and reduced subsidy costs by about 15%.

SDIC Securities | Industry Research Intern, Healthcare

May 2024 – Aug 2024

- Used Choice data and penetration-rate benchmarks to assess intraocular-lens and orthokeratology-lens markets; built regression forecasts for 2026 market size with error controlled within $\pm 8\%$.
- Analyzed Aibo Medical's segment revenue and margin trends and built a three-scenario DCF and P/E valuation model with sensitivity analysis, supporting a 10,000-word equity research report and investment recommendation.

SELECTED PROJECTS

Multimodal Short-Video Content Analysis Agent

Jul 2026 – Aug 2026

- Designed an agent workflow for overseas AIGC growth and creator-content review, connecting public-content collection, subtitle transcription, key-frame recognition, and LLM analysis to identify hooks, product exposure, sponsorship signals, and calls to action automatically.

Ethereum Token Fraud Detection

Jan 2026 – Apr 2026

- Engineered 27 behavioral features from 2.2M on-chain transactions and benchmarked six classifiers; tuned LightGBM with five-fold cross-validation to achieve 0.89 macro F1, 0.96 AUC, and a 90% fraud-detection rate.
- Applied SHAP to surface fraud signals such as short active windows and concentrated senders, translating model findings into actionable risk-control rules and a business-cost-aware decision threshold.

LEADERSHIP

Huawei Connect 2024 | Volunteer Team Lead

Sep 2024

- Trained and managed venue volunteers, standardized service procedures, handled on-site incidents, and served as the liaison with Huawei; recognized as an Excellent Performer in the top 2%.
